## Levitron - Anti-Gravity Top

[Main Description](#)[Additional Images](#)[Action Shots](#) [Zoom](#) [More Images](#)**Yes. It's Levitating. Really.**

Of course it's using MAGIC to do so - the magic of magnetic repulsion and attraction that is. The Levitron is a magnetic anti-gravity top that is just as fun to setup as it is to watch in motion.

Basically, you just use the included top weights to adjust to the perfect weight (which varies from location to location and surface to surface), then you adjust the legs on the base. Then spin the top, slowly lift the lifter (with top on it) until the top escapes the platform and release! Voila. A top levitating in mid air. And depending on how well you set it up, it will spin up to five full minutes! Wave your hand underneath (or anything non-metallic), and amaze your family and co-workers! And all this with no batteries - sheer magnetic wizardry!

Of course it is not a piece of cake to setup. You have to observe it

**Price:**

\$29.99 - \$39.99

**Availability:** [ [info](#) ]

In stock, except for the following item(s):  
Cherry Wood

carefully as you are making the appropriate adjustments to the weight and to the base. It can be challenging but the reward is well worth it. Move the Levitron to another location though and you'll have to recalibrate the weights and levelers! Take the challenge and master it. It may take you five minutes, it may take longer.

Your Levitron arrives complete with:

- One Magnetic base w/three adjustable legs
- One floating top
- One lifter
- One spinning plane
- Several adjustment weights
- Instruction sheet & Levitron Physics guide

Your choice of either:

- Omega Edition - Red/Black Molded Plastic
- Cherry Wood - Wooden base and legs and hole in center!

Because of the high strength of the magnet in the base (and that it is purposely not shielded), ThinkGeek recommends you do not set the Levitron next to your monitor! Duh.

Tell us your favorite OS. Take our [46.4-second survey!](#)
